

Potential maps to answer specific questions

Fish habitat

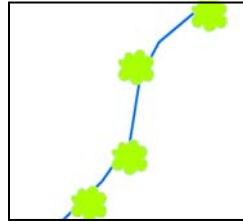

[click here for an example](#)

gravel/cobble

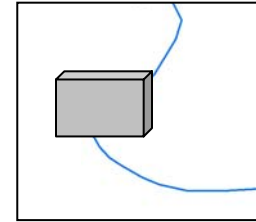

>50% shade cover

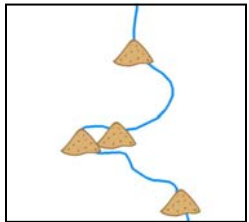

invertebrate richness

drop w/o fish ladder

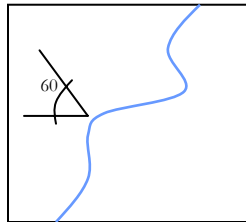

Erosion potential

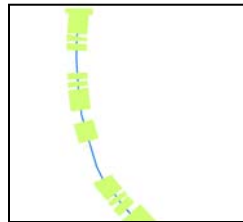

[click here for an example](#)

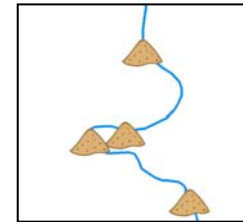

bank slope >60°

<50% vegetated banks

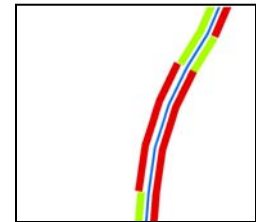

severe erosion sites

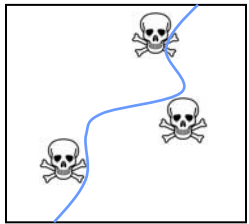

and/or high erosion potential observed during Bioassessment surveys

reinforced banks

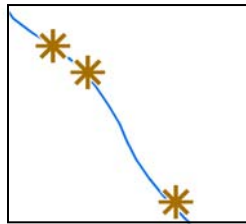

Pollution potential

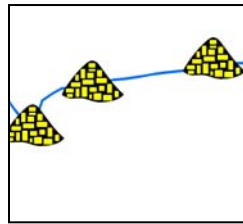

[click here for an example](#)

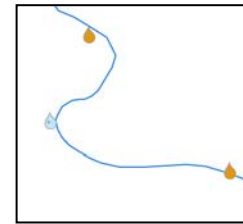

debris jam <50% natural

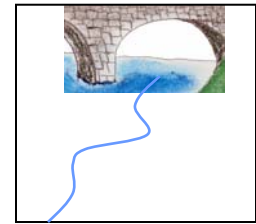

dumping areas

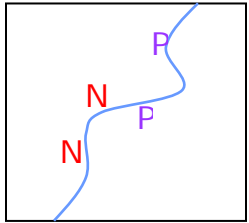

outfalls (esp. flowing)

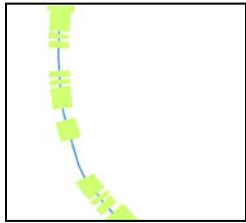

bridge crossings

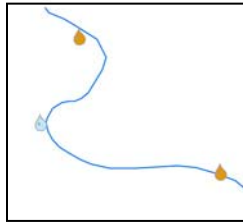

Nutrients to creek

in-stream vegetation

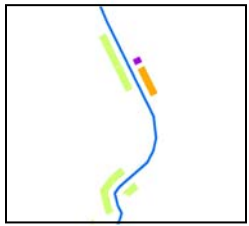

outfalls (esp. flowing)

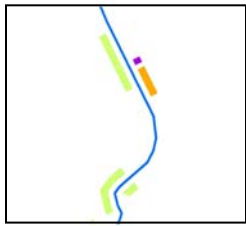

[click here for an example](#)

Invasive species

invasive species
